

Roddy R. Tejeda Rosario

- Full-Stack Software Engineer

Experienced Full-Stack Engineer with more than 3 years programming with JavaScript, React, Angular, etc... Proven track record in building secure, scalable solutions. Proficient in testing with Jest and Cypress. Eager to contribute to a collaborative team, delivering intuitive frontends and solutions aligned with business goals.

WORK EXPERIENCE

Full-Stack Software Engineer

- *Dwald Consulting* - Software Consulting - **Dominican Republic** - oct. 2023 - dic. 2023

RESPONSIBILITIES

- According the business goals; I developed a business entity ensuring seamless integration. Using Asp.Net MVC with Dependency Injection and Linq.
- Using UX/UI. I build MVC controllers and custom views to establish user trust with intuitive frontends.
- Worked with a team of Engineers to completely recreate our entire site from scratch.
- Engaged directly with the business side i proposed AutoMapper to ensure scalable code.
- Employed Design Patterns, DTOs, and Fluent Validator to enhance security of the app.
- We employ database migrations to guarantee a seamless transition.
- Version control was managed through Git and Github, integrating Jira for task workflow.

KEY ACCOMPLISHMENTS

- Improved business presentation by creating frontend interfaces from nothing to an intuitive user interface by applying UX/UI principles.
- Optimized the entities of the business by proposing a mapper from manual to automatic mapping and clean code by using AutoMapper.
