Roddy R. Tejeda Rosario
- Full-Stack Software Engineer

Full Stack with more than 3 years programming with React, Angular, .Net, Node, NextJs, AWS ect...
Focused on creating complete and efficient applications, ensuring fluid integration between the
user interface and the server logic. My comprehensive knowledge allows me to easily adapt to
changes, introduce new ideas and ensure that the technology we use is always beneficial to the
company.

WORK EXPERIENCE

Full-Stack Software Engineer
- *Dwald Consulting* - Software Consulting - Dominican Republic

RESPONSIBILITIES
• Create a business entity that ensures integration between Front and Back End. Using Asp.Net
MVC with DI and Linq.
• Plan, Design and Create attractive and functional user interfaces with UX/UI, MVC Controllers
and Views.
• Worked with several engineers to create complete applications, ensuring effective integration.
• Committed to the business side, I proposed AutoMapper solving technical and scalability
issues.
• Improve security at Front and Back End; With design patterns, DTO and Fluent Validator.
• To guarantee integration with the Front and Usability; We use database migrations
• Version control was managed with Git and Github, integrating Jira for task flow.

KEY ACCOMPLISHMENTS
• Improved business presentation by creating frontend interfaces from nothing to an intuitive
user interface by applying UX/UI principles.
• Optimized the entities of the business by proposing a mapper from manual to automatic
mapping and clean code by using AutoMapper.
